# NOTICE OF CHANGE TO CROP INTENTION

The Notice of Change to Crop Intention must be completed and submitted prior to carrying out any act of termination or change of use of an insured crop.

The Notice of Change to Crop Intention is used to notify the Insurer of any intention to terminate or change the use of a crop to anything other than taking it to harvest completion. The Insured is required to give written notice to Global Ag Risk Solutions of its intentions prior to carrying out any act.

Once Global Ag Risk Solutions has received the completed Notice of Change to Crop Intention form, they will contact the Insured to decide if third party verification is needed and will arrange for verification and valuation of the crop. The crop should <u>not</u> be destroyed, harvested, or altered in any way until verification and/or valuation are completed. Notification should allow Global Ag Risk Solutions sufficient time to complete the verification (at least 1 week).

If your crop has been damaged, but you are still planning on taking it to harvest, this form does not need to be submitted. Once this form is submitted, and the subsequent appraisal is complete, any deemed value will be added to Gross Revenue for the purposes of calculating a claim, regardless of whether it is destroyed or ultimately harvested.

This form should be preceded by a Peril Notification.

PLEASE REFER TO "HOW TO COMPLETE THE NOTICE OF CHANGE TO CROP INTENTION" FOR FULL INSTRUCTIONS

Please complete & return the Notice of Change to Crop Intention form to crops@agrisksolutions.ca
